

Reliance Globalcom Joins Stealth Communications Voice Peering Fabric and Forms Strategic Alliance

San Francisco, CA /Voice Peering Forum Summer 2008/ Reliance Globalcom and Stealth Communications today announced that Reliance Globalcom has joined Stealth Communications' Voice Peering Fabric (VPF) and formed an alliance to extend the reachability of the VPF to carriers and enterprise organizations across 50 countries.

Located in the major international telecom hubs, VPF is the world's largest peering network for organizations to exchange voice (VoIP) and telephony related services without relying on traditional telephone networks. VPF is designed as a private voice Internet and functions as an exchange or meet-point for its members to establish peer-to-peer connections in a secure, quality-of-service environment. Traffic on the VPF is expected to surpass 400 billion minutes this year, up from 200 billion minutes from 2007.

By joining the VPF, Reliance Globalcom will be able to reduce time to market, time to revenue by exchange of VoIP traffic directly with other connected organizations through the VPF and its ENUM registry. In addition, Reliance Globalcom will be able to offer PSTN termination worldwide to VPF Members directly across the VPF.

The alliance between the two companies is designed to expand the global network reach and offer new and innovative product and services to the VPF community through the next generation fiber network owned by Reliance Globalcom.

Furthermore the alliance will provide additional choices for telecom service providers and thus enhance competition to increase value and cost benefits to the ultimate end users. Service providers will be able to access the VPF platform from new markets at an attractive cost base utilizing the Reliance Globalcom network.

"We are pleased to be apart of the VPF community and to provide VPF's community of users the opportunity to avail themselves of Reliance Globalcom's extensive network assets" indicates Mike Sauer, President, Global Voice Services for Reliance Globalcom.

"We look forward to working with Stealth Communications on network and product synergies to introduce quality and innovative services to our respective customer bases".

"On behalf of the VPF and its members, we welcome Reliance Globalcom to the community", said Shrihari Pandit, President & CEO of Stealth Communications. "The telecommunications industry is undergoing a major business and technology transformation, and Reliance Globalcom is on the forefront of this change.

###
