WorleyParsons enlists Reliance Globalcom to energise its global network

Leading professional services provider expands operations in Asia and Middle East with Reliance Globalcom's hybrid network approach

Sydney, 26 June 2009 – WorleyParsons, a leading provider of professional services to the global energy and resources industries, has selected Reliance Globalcom for the design, implementation and ongoing provision of a new regional Wide Area Network (WAN) to link business critical office and operational project locations across nine countries.

In a three year deal, the new WorleyParsons network will integrate multiple, national and international carriers utilising Reliance Globalcom's award winning MPLS Matrix product, to support core financial and IP enabled applications. The solution will enable superior redundancy scalability and performance across the global network to facilitate rapid network expansion into new locations and markets.

The 24 x7 support of the solution across Middle East, Asia, and Europe will enable WorleyParsons to focus on providing enhanced IT support to the core operational functions in the regions, while reducing the operational cost of the existing IT resources currently being expended on WAN and carrier management.

"Our global operations are expanding in many markets across the world and Reliance Globalcom's experience of providing in-country support with local understanding was certainly a major consideration in our decision-making process," commented Vito Forte, WorleyParsons' CIO. "The manner in which Reliance Globalcom can keep adapting the solution to our changing business needs means that their solution provides us with greater business agility."

Reliance Globalcom's carrier neutral operating model, based on established relationships with over 700 carriers and service providers worldwide, enables WorleyParsons access to the best selection of in-country and international Internet service providers. This was vital for remote site locations in challenging markets.

"The agreement with WorleyParsons demonstrates Reliance Globalcom's ability to take a unified global network approach, providing full local in-country network support, from challenging locations such as remote Asian project sites, to new offices in major European cities," said Tim Sullivan, Managing Director of Reliance Globalcom-Australasia.

"Reliance Globalcom will provide WorleyParsons with a scalable and resilient service able to incorporate higher bandwidth IP enabled applications paired with very robust processes. We will continue to update WorleyParsons on new technologies and price points as they emerge through the term to keep driving their network spend harder each year and help maximise the return they get on their network."

About WorleyParsons

WorleyParsons will be the preferred global provider of technical, project and operational support services to our customers, using the distinctive WorleyParsons' culture to create value for them and prosperity for our people.
